## **CJ-series Interrupt Input Units**

## CJ1W-INT01

CSM\_CJ1W-INT01\_DS\_E\_2\_1

# High-speed Starting of I/O Interrupt Tasks. Use Up to Two Units for a Total of Up to 32 Interrupt Inputs.

 Receive inputs to start I/O interrupt tasks. When the Interrupt Input Unit receives an input, the CPU Unit will interrupt execution of the cyclic tasks in the normal program and execute an I/O interrupt task.

CJ1W-INT01

## **Features**

- High-speed ON response of 0.05 ms
- Use up to 32 interrupt inputs with up to two Units per CPU Unit.
- Applicable with both NPN and PNP output devices. Polarity selection is not required. \*
- \* The same polarity is used for the same common.

## **Ordering Information**

#### **International Standards**

- The standards are abbreviated as follows: U: UL, U1: UL (Class I Division 2 Products for Hazardous Locations), C: CSA, UC: cULus, UC1: cULus (Class I Division 2 Products for Hazardous Locations), CU: cUL, N: NK, L: Lloyd, and CE: EC Directives.
- Contact your OMRON representative for further details and applicable conditions for these standards.

## **Interrupt Input Units**

	Product	Specifications						No. of words	Current consumption (A)		Madal	04
Unit type	name	I/O points	Input voltage current	Commons	Input pulse width conditions	Max. Units mountable per Unit	External connection	allocated	5 V	24 V	Model	Standards
CJ1 Basic I/O Units	Interrupt Input Unit	16 inputs	24 VDC, 7 mA	16 points, 1 common	ON time: 0.05 ms max. OFF time: 0.5 ms max.	2	Removable terminal block	1 word	0.08	1	CJ1W-INT01	UC1, N, L, CE

Note: 1. Can be used only on CPU Racks, and not on Expansion Racks.

2. The locations where the Units can be mounted depend on the CPU Rack and the CPU Unit model.

CJ2H-CPU6□-EIP: From the slot next to the CPU Unit until the fourth slot.

CJ1G, CJ1H: From the slot next to the CPU Unit until the fifth slot. CJ1M: From the slot next to the CPU Unit until the third slot.

3. With the SYSMAC NJ-series Controllers, Interrupt Input Units can be used as normal Basic Input Units. They cannot be used to start I/O interrupt tasks.

#### **Accessories**

There is no accessory for the CJ series Interrupt Input Units.

## **Mountable Racks**

	NJ sy	rstem	CJ system (CJ1, CJ2)			CP1H system	NSJ system		
Molde	CPU Rack Expansion		CJ1-CPU Rack	CPU Units other than left	Expansion Backplane	CP1H PLC	NSJ Controller Expansion Backplane		
CJ1W-INT01	2 Units *1*4	Not supported *3	Not supported	2 Units *2	Not supported *3	Not supported	Not supported	Not supported *3	

<sup>\*1.</sup> The Interrupt Input Unit can be mounted in slots 0 to 4 on the CJ1-CPU Rack. An Incorrect Unit/Expansion Rack Connection error will occur if an Interrupt Input Unit is mounted to slot 5 or higher.

- \*2. Connectable slot position changes with the CPU Unit.
  - CJ1M-CPU□□: Slot No.0 to 2
  - CJ2H-CPU□□-EIP: Slot No.0 to 3
  - CPU Unit other than abobe: Slot No.0 to 4

If the Unit is mounted to the slot other than abobe, I/O setting error will occur.

- \*3. An I/O setting error will occur if an Interrupt Input Unit is mounted to an Expansion Rack.
- \*4. Interrupt Input Units can be used as normal Basic Input Units. They cannot be used to start I/O interrupt tasks.

## **Specifications**

## **CJ1W-INT01 Interrupt Input Unit (16 Points)**

	rrupt input onit (16 Points)							
Name	16-point Interrupt Input Unit with Terminal Block							
Model	CJ1W-INT01							
Rated Input Voltage	24 VDC							
Rated Input Voltage Range	20.4 to 26.4 VDC							
Input Impedance	$3.3~\mathrm{k}\Omega$							
Input Current	7 mA typical (at 24 VDC)							
ON Voltage/ON Current	14.4 VDC min./3 mA min.							
OFF Voltage/OFF Current	5 VDC max./1 mA max.							
ON Response Time	0.05 ms max.							
OFF Response Time	0.5 ms max.							
Number of Circuits	u.5 ms max.  16 (16 points/common, 1 circuit)							
Number of Simultaneously ON Points	100% (16 points/common) simultaneously ON (24 VDC)							
Insulation Resistance	20 M $\Omega$ between external terminals and GR terminal (at 100 VDC)							
DielectrQic Strength	1,000 VAC between external terminals and GR terminal for 1 minute at a leakage current of 10 mA max.							
Internal Current Consumption	80 mA max.							
Weight	110 g max.							
Accessories	None							
Circuit Configuration	<ul> <li>Up to two Interrupt Input Units can be mounted to the CPU Rack. They must be connected as one of the five Units immediately next to the CPU Unit. If an Interrupt Input Unit is connected in any other position, an Incorrect Unit/Expansion Rack Connection error will occur.</li> <li>Set the pulse width of signals input to the Interrupt Input Unit so they satisfy the following conditions.</li> <li>The signal names of the terminals are the device variable names.</li> <li>The device variable names are the names that use "Jxx" as the device name.</li> </ul>							
External connection and terminal-device variable diagram	Signal name  Connector pin Name  Jxx_Ch1_In00  A0  B0  Jxx_Ch1_In01  Jxx_Ch1_In04  A2  B1  Jxx_Ch1_In05  Jxx_Ch1_In08  A4  B3  Jxx_Ch1_In07  Jxx_Ch1_In10  A5  B5  Jxx_Ch1_In09  Jxx_Ch1_In10  A5  B5  Jxx_Ch1_In11  COM  A8  B7  COM  A8  B8  The polarity can be connected in either direction.  The signal names of the terminals are the device variable names. The device variable names are the names that use "Jxx" as the device name.							

Note: With NJ-series Controllers, Interrupt Input Units can be used as normal Basic Input Units.

They cannot be used to start I/O interrupt tasks.

\* Terminal numbers A0 to A8 and B0 to B8 are used in the external connection and terminal-device variable diagrams. They are not printed on the Units.

## **External Interface**

## **Wiring Terminal Blocks**

## **Electric Wires**

The following wire gauges are recommended.

Terminal Block Connector	Wire Size
18-terminal	AWG 22 to 18 (0.32 to 0.82 mm <sup>2</sup> )

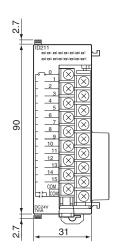

## **Crimp terminals**

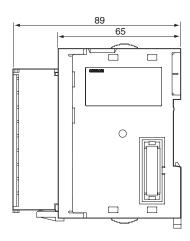

Use crimp terminals (M3) having the dimensions shown below.

Dimensions (Unit: mm)

## **Read and Understand This Catalog**

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments

## Warranty and Limitations of Liability

#### WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

#### LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

## **Application Considerations**

#### **SUITABILITY FOR USE**

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the products.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this catalog.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCTS ARE PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

## PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

## Disclaimers

#### CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the products may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

## **DIMENSIONS AND WEIGHTS**

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

#### PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

### **ERRORS AND OMISSIONS**

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

2011.11

In the interest of product improvement, specifications are subject to change without notice.
