## EPCOS

# Aluminum electrolytic capacitors 

## Capacitors with 4-pin snap-in terminals and solder pins

Series/Type: B43510, B43520<br>Date: March 2011

© EPCOS AG 2011. Reproduction, publication and dissemination of this publication, enclosures hereto and the information contained therein without EPCOS' prior express consent is prohibited.

## Compact - $85^{\circ} \mathrm{C}$

## Long-life grade capacitors

## Applications

- Frequency converters
- Switch-mode power supplies in industrial and consumer electronics
- Uninterruptible power supplies

## Features

$\square$ Voltage derating ( $0.88 \cdot \mathrm{~V}_{\mathrm{R}}$ for $\mathrm{V}_{\mathrm{R}} \leq 450 \mathrm{~V}$ ) enables $105^{\circ} \mathrm{C}$

B43510

B43520 operation, more details available upon request

- Extremely high volumetric efficiency
- High ripple current capability

Many different case sizes

- Pinning ensures correct insertion
- RoHS-compatible

## Construction

- Charge/discharge-proof, polar
- Aluminum case, fully insulated with PVC
- Version with additional PET insulation cap on terminal side available for insulating the capacitor from the PCB (B43510 only)
- Overload protection by safety vent on the case wall

## Terminals

- 4-pin snap-in terminals ( 6.3 mm and 4.5 mm length)
- Solder pin mounting on printed circuit boards, pins fit standardized spacings on PCB

## Specifications and characteristics in brief

B43510, B43520
Compact - $85{ }^{\circ} \mathrm{C}$

## Dimensional drawings

## B43510, 4-pin snap-in terminals, PVC insulation

Mounting holes

| Dimensions <br> $(\mathrm{mm})$ | Approx. <br> weight (g) | Packing <br> units (pcs.) |  |
| :--- | ---: | :--- | :--- |
| $\mathrm{d}+1$ | $\mathrm{I} \pm 2$ |  |  |
| 35 | 50 | 63 | 60 |
| 35 | 60 | 76 | 36 |
| 35 | 70 | 88 | 36 |
| 35 | 80 | 101 | 36 |
| 35 | 100 | 126 | 36 |
| 40 | 40 | 71 | 33 |
| 40 | 50 | 89 | 33 |
| 40 | 60 | 107 | 33 |
| 40 | 70 | 125 | 33 |
| 40 | 80 | 143 | 33 |
| 40 | 90 | 161 | 33 |
| 40 | 100 | 178 | 33 |
| 45 | 40 | 90 | 28 |
| 45 | 50 | 113 | 28 |
| 45 | 60 | 136 | 28 |
| 45 | 70 | 158 | 28 |
| 45 | 80 | 181 | 28 |
| 45 | 90 | 204 | 28 |
| 45 | 100 | 226 | 28 |

Standard snap-in terminals:
length $(6.3 \pm 1) \mathrm{mm}$.
Also available with length of $(4.5-1) \mathrm{mm}$.
All pin holes must be drilled into the PC-board, since the unconnected pins serve as mountings. These pins must be soldered to isolated pads or pads with the same potential as the negative pole.

B43510, B43520
Compact - $85^{\circ} \mathrm{C}$

B43510, 4-pin snap-in terminals, PVC insulation and PET insulation cap on terminal side

Standard snap-in terminals:
length $(6.3+1 /-1.4) \mathrm{mm}$. Also available with length of ( $4.5-1.4$ ) mm. PET insulation cap is positioned under the insulation sleeve.

All pin holes must be drilled into the PC-board, since the unconnected pins serve as mountings. These pins must be soldered to isolated pads or pads with the same potential as the negative pole.

## B43520, solder pins

Pole markings: Plus: +; Minus: -
All pin holes must be drilled into the PC-board, since the unconnected pins serve as mountings. These pins must be soldered to isolated pads or pads with the same potential as the negative pole.

## Packing of 4-pin snap-in terminal and solder pin capacitors

For ecological reasons the packing is pure cardboard.

## Ordering codes for terminal styles and insulation features

Identification in 3rd block of ordering code
4-pin snap-in terminal capacitors

| Terminal version | Insulation version |  |
| :--- | :--- | :--- |
|  | PVC | PVC plus PET cap |
| Standard terminals 6.3 mm | M000 | M080 |
| Short terminals 4.5 mm | M007 | M087 |

Typical behavior at $20^{\circ} \mathrm{C}$

## Cautions and warnings

## Personal safety

The electrolytes used by EPCOS have not only been optimized with a view to the intended application, but also with regard to health and environmental compatibility. They do not contain any solvents that are detrimental to health, e.g. dimethyl formamide (DMF) or dimethyl acetamide (DMAC).

Furthermore, part of the high-voltage electrolytes used by EPCOS are self-extinguishing. They contain flame-retarding substances which will quickly extinguish any flame that may have been ignited.

As far as possible, EPCOS does not use any dangerous chemicals or compounds to produce operating electrolytes. However, in exceptional cases, such materials must be used in order to achieve specific physical and electrical properties because no safe substitute materials are currently known. However, the amount of dangerous materials used in our products has been limited to an absolute minimum. Nevertheless, the following rules should be observed when handling aluminum electrolytic capacitors:

Any escaping electrolyte should not come into contact with eyes or skin.

- If electrolyte does come into contact with the skin, wash the affected parts immediately with running water. If the eyes are affected, rinse them for 10 minutes with plenty of water. If symptoms persist, seek medical treatment.
Avoid breathing in electrolyte vapor or mists. Workplaces and other affected areas should be well ventilated. Clothing that has been contaminated by electrolyte must be changed and rinsed in water.

## Product safety

The table below summarizes the safety instructions that must be observed without fail. A detailed description can be found in the relevant sections of chapter "General technical information".

## Note

All dimensions are given in mm.

## Important notes

The following applies to all products named in this publication:

1. Some parts of this publication contain statements about the suitability of our products for certain areas of application. These statements are based on our knowledge of typical requirements that are often placed on our products in the areas of application concerned. We nevertheless expressly point out that such statements cannot be regarded as binding statements about the suitability of our products for a particular customer application. As a rule, EPCOS is either unfamiliar with individual customer applications or less familiar with them than the customers themselves. For these reasons, it is always ultimately incumbent on the customer to check and decide whether an EPCOS product with the properties described in the product specification is suitable for use in a particular customer application.
2. We also point out that in individual cases, a malfunction of electronic components or failure before the end of their usual service life cannot be completely ruled out in the current state of the art, even if they are operated as specified. In customer applications requiring a very high level of operational safety and especially in customer applications in which the malfunction or failure of an electronic component could endanger human life or health (e.g. in accident prevention or lifesaving systems), it must therefore be ensured by means of suitable design of the customer application or other action taken by the customer (e.g. installation of protective circuitry or redundancy) that no injury or damage is sustained by third parties in the event of malfunction or failure of an electronic component.
3. The warnings, cautions and product-specific notes must be observed.
4. In order to satisfy certain technical requirements, some of the products described in this publication may contain substances subject to restrictions in certain jurisdictions (e.g. because they are classed as hazardous). Useful information on this will be found in our Material Data Sheets on the Internet (www.epcos.com/material). Should you have any more detailed questions, please contact our sales offices.
5. We constantly strive to improve our products. Consequently, the products described in this publication may change from time to time. The same is true of the corresponding product specifications. Please check therefore to what extent product descriptions and specifications contained in this publication are still applicable before or when you place an order. We also reserve the right to discontinue production and delivery of products. Consequently, we cannot guarantee that all products named in this publication will always be available. The aforementioned does not apply in the case of individual agreements deviating from the foregoing for customer-specific products.
6. Unless otherwise agreed in individual contracts, all orders are subject to the current version of the "General Terms of Delivery for Products and Services in the Electrical Industry" published by the German Electrical and Electronics Industry Association (ZVEI).
7. The trade names EPCOS, BAOKE, Alu-X, CeraDiode, CSMP, CSSP, CTVS, DeltaCap, DigiSiMic, DSSP, FormFit, MiniBlue, MiniCell, MKK, MKD, MLSC, MotorCap, PCC, PhaseCap, PhaseCube, PhaseMod, PhiCap, SIFERRIT, SIFI, SIKOREL, SilverCap, SIMDAD, SiMic, SIMID, SineFormer, SIOV, SIP5D, SIP5K, ThermoFuse, WindCap are trademarks registered or pending in Europe and in other countries. Further information will be found on the Internet at www.epcos.com/trademarks.

[^0]:    1) Refer to chapter "General technical information, 5.3 Calculation of useful life" on how to interpret the useful life graphs.
